## About Me

---

Computer Science student with hands-on experience in machine learning, computer vision, and NLP, proficient in Python, TensorFlow, Keras, and Scikit-learn. Skilled in building secure, data-driven systems, with practical exposure gained through a cybersecurity internship and published research in applied machine learning. Currently seeking a Machine Learning role where I can apply my technical skills and problem-solving ability to build efficient, real-world AI solutions.

## Education

---

### MSA University

*Bachelor of Science in Computer Science, GPA: 3.73/4.00*

Giza, Egypt

*Expected 2027*

- Relevant Coursework: Machine Learning, Data Structures & Algorithms, Probability & Statistics, Computer Networks, Database Systems, Linear Algebra

## Experience & Training

---

### Machine Learning Trainee – DEPI (Digital Egypt Pioneers Initiative)

2026 – Present

*Microsoft Machine Learning Track*

- Developing practical machine learning skills through Microsoft's Machine Learning track, covering core ML concepts, data analysis, and model development.
- Applying machine learning concepts through hands-on exercises and projects using Python and related tools.

### Cybersecurity Intern – Cyshield

July 2025 – August 2025

*Cairo, Egypt*

- Gained hands-on exposure to cybersecurity fundamentals and key concepts through industry-focused training.
- Explored different cybersecurity career paths and the technical skills required for each.
- Learned real-world security practices and how security teams operate in professional environments.

## Projects

---

### Face Recognition Attendance System | IEEE Published Research

- Developed a face recognition-based attendance system using a publicly available dataset.
- Prepared the dataset and divided it into training and testing sets for model training and evaluation.
- Published a research paper based on the project in IEEE.

### Sign Language to Text | Machine Learning

- Developed a machine learning-based system to convert sign language into text.
- Prepared a publicly available dataset and divided it into training and testing sets.
- Trained and compared five different machine learning models for sign language recognition.

### Computer Science Research Papers Web Scraper

- Developed a web scraping project inspired by arXiv for collecting Computer Science research papers.
- Scraped approximately 1,000 research papers and organized them into different categories.
- Structured the collected research data for categorization and analysis.

### MERN Stack Web Application

- Developed a full-stack web application using MongoDB, Express.js, React, and Node.js.
- Implemented user authentication and basic security features.
- Integrated the frontend and backend components into a functional web application.

### C# Game Development

- Developed two interactive games using C#.
- Applied object-oriented programming and game development concepts to implement the games.

### Huffman Coding | C++

- Implemented the Huffman Coding algorithm in C++ for lossless data compression.
- Applied data structures and algorithmic concepts in the implementation.

## Courses and Certifications

---

**Cybersecurity Basics** — Coursera: Covered cybersecurity fundamentals, common threats, and basic security practices.

**Network Security Course** — Huawei: Learned network security fundamentals, common threats, and basic security mechanisms.

## Skills

---

**Technical Skills:** Python, C#, JavaScript, HTML/CSS, SQL, C++

**AI & Data:** Machine Learning, NLP, Computer Vision, Scikit-learn, TensorFlow, Keras, Pandas, Matplotlib, Seaborn

**Tools:** Git, Visual Studio, Cisco Packet Tracer

**Soft Skills:** Critical Thinking, Communication, Problem-Solving, Working Under Pressure, Organization & Time Management

## Languages

---

**Arabic:** Native    **English:** B1
